ERV-HI is a guide to the evidence-based approach to HIV risk reduction. It is designed to help you understand the science behind the approach and how to apply it in your own life.

ERV-HI is a guide to the evidence-based approach to HIV risk reduction. It is designed to help you understand the science behind the approach and how to apply it in your own life.

1. What is the evidence-based approach to HIV risk reduction?

The evidence-based approach to HIV risk reduction is based on the science of behavior change. It focuses on the most effective strategies for reducing HIV risk, such as condom use, PrEP, and PEP.

Matthew 10:21:

“...for you will be hated by all because of the name of the Son of Man. But whoever endures to the end will be saved.” (ERV-HI)

Matthew 12:1:

“The Son of Man is Lord of the Sabbath.” (ERV-HI)

Wives, how do you feel about the situation?
