Figure 2: A schematic diagram of the proposed system architecture. The diagram shows a central block labeled "Proposed System" which is connected to two main components: "Data Collection" and "Data Analysis". The "Data Collection" component is further divided into "Sensor Data" and "User Data". The "Data Analysis" component is divided into "Feature Extraction" and "Model Training". The "Proposed System" block is also connected to a "Performance Evaluation" block, which is further divided into "Accuracy" and "Precision".
